

Differences between "Home food and street food".

Home food and street food are quite different from each other in many ways. Home food is usually cooked with care and cleanliness, while street food is often prepared quickly in open places. Home food is healthy, fresh, and cooked with balanced ingredients, but street food may contain too much oil and spices, which can be harmful. Eating at home is safer because we know the quality of the ingredients, whereas street food may sometimes be unhygienic. However, street food is tasty, cheap, and easy to find anywhere. In short, home food keeps us healthy, while street food gives us quick pleasure and variety.

☐ Causes of pollution in Bangladesh.

There are different types of pollution in Bangladesh such as air pollution, water pollution, and sound pollution. Each type has different causes but all harm our environment. Air pollution mainly comes from smoke emitted by vehicles, brick kilns and factories. Water pollution, on the other hand, happens when industries and people throw waste, chemicals, and garbage into rivers and ponds. Sound pollution is caused by loud horns, construction works, and microphones used in public places. Though these causes are different, they all make our environment dirty and unhealthy. In short, pollution in Bangladesh is caused by human activities, and it is destroying our natural beauty and public health.

Causes and effect of "brain drain Bangladesh".

Brain drain means the migration of talented and educated people from one country to another for better opportunities. In Bangladesh, many skilled doctors, engineers, scientists, and students go abroad to get higher salaries, better education, and improved living conditions. The main causes of brain drain are unemployment, low income, political instability, and lack of research facilities in our country. As a result, Bangladesh loses many bright and capable people who could help in national development. This creates a shortage of skilled manpower and slows down progress in science, technology and education. In short; brain drain weavens the nation by taking away its most talented citizen.

Online classes are better than offline classes in many ways. They allow students to learn from anywhere, saving travel time and cost. Lessons can be recorded and watched again, which helps students understand topics better. Online platforms provide many learning tools such as videos, quizzes, and interactive materials. Students can also learn at their own pace and schedule. Moreover, online classes connect learners with teachers and classmates from different places.

Offline classes:

For these reasons, online classes are often more flexible, convenient, and time-saving than traditional

My most Frustrating Day at DUET.

My most frustrating day at DUET was the day when our job exam got suddenly canceled due to a power failure. I had prepared very hard for that exam and was confident about doing well. But when the lights went off and the announcement came that the exam was postponed, I felt very disappointed. All my preparation seemed wasted at the moment. However, that day taught me an important lesson - sometimes unexpected problems come, but we must stay patient and positive to overcome them.

My most memorable day at DUET.

My most memorable day at DUET was the day I got admitted to the university. It was a dream come true for me to be a student of Dhava University of Engineering and Technology. I still remember the excitement when I first entered the campus - the green surroundings, the friendly faces, and the feeling of starting a new chapter in life. Meeting my classmates and professors for the first time filled me with joy and motivation. That day made me realize that hard work truly pays off, and it inspired me to give my best throughout my engineering journey.

☐ How to improve your personality:

Improving your personality is essential for personal growth and success in life. One way to enhance your personality is by building self-confidence, which allows you to approach challenges with a positive mindset. Another important factor is developing strong communication skills, as they help you connect with others and express your thoughts effectively. Moreover, cultivating empathy and emotional intelligence can deepen your relationship and create a positive social environment. In conclusion, by focusing on self-confidence, communication, and empathy, you can continuously work towards improving your personality and becoming the best version of yourself.

Difference between Hommet food and street food :

While street food offers immediate convenience and diverse flavors, home-cooked food consistently surpasses it in terms of health, hygiene, and overall nutritional control. Firstly, the primary advantage of preparing meals at home is the complete control over ingredients, allowing one to select fresh produce, limit unhealthy additives, and manage the precise amounts of oil, salt and sugar used. Secondly, conversely, street food vendors though often masters of flavor, operate under conditions where hygiene standards are more difficult to regulate, posing a greater risk of inconsistent quality and foodborne illnesses due to exposure or high-volume preparation. Lastly, beyond health, home cooking is often more economical and fosters stronger family bonds through shared meal preparation and mealtimes, an emotional and financial benefit that street food, despite its lower individual price point cannot replicate. Conclusion, Therefore while street food provides a quick cultural fix, homemade food remains the superior and more sustainable choice for long-term health and well-being.

Descriptive paragraph, pollution and Global warming.

pollution has become a major reason behind global warming in today's world. Firstly, Factories, vehicles, and burning fossil fuels release harmful gases like carbon dioxide which pollute the air. Secondly, These gases trap heat in the atmosphere and increase the Earth's temperature causing global warming. Lastly, ~~Therefore, reducing~~ po. As a result, ice caps melt, sea levels rise, weather patterns change, and natural disasters become more frequent. Conclusion, Therefore, reducing pollution and promoting clean energy and essential steps to protect our planet from the dangers of global warming.

A comparative and contrastive essay:

□ A comparative and Online based education system:

① Traditional and Online based education system:
In recent decades, the realm of education has undergone significant transformation, due to the advent of technology. Education plays a vital role in shaping individuals and society. Over time, the method of education has changed significantly. The two most common systems today are the traditional education system and the online-based education system. Although both aim to provide knowledge and skills, they differ in structure, teaching methods, interaction, and flexibility.

To begin with, both traditional and online education system aim to provide structured learning, evaluate progress, and award certification upon successful completion. Whether in a physical classroom or a virtual one, students participate in lessons, complete assignments, and take exams to assess their understanding. Despite these differences in environment, the core educational goals and structured pathways remain strikingly similar.

However, a major difference lies in the area of flexibility and accessibility. Traditional education requires

students to attend classes in person, often limiting their options due to geographic or time constraints. On the other hand, online education is widely recognized for its flexibility, allowing students to learn at their own pace and from virtually any location.

Finally, the student-teacher interaction varies greatly between the two systems. In traditional classrooms, interactions are direct, immediate, and often more personal, allowing students to ask questions, engage in discussion, and receive instant feedback. Online education, while offering forums, emails, and virtual office hours, often lacks the immediacy and emotional connection found in face-to-face communication.

In conclusion, although traditional and online-based education systems differ in their learning environment, flexibility, and student-teacher interaction, they share the overarching goal of delivering quality education. While traditional education offers structure and direct engagement, online education provides unmatched convenience and broader access.

* Argumentative essay:

① Should the undergraduate students be allowed to work on part-time basis?

In the modern world, higher education has become increasingly expensive, and students are under growing financial pressure. As a result, the question of whether undergraduate students should be allowed to work on a part-time basis has become an important issue. While some people argue that part-time work distracts students from their studies, others believe it is beneficial.

Most importantly, one of the strongest arguments in favor of part-time work is financial independence. Many undergraduate students come from middle or low-income families and struggle to pay tuition fees, accommodation costs, and daily expenses, part-time jobs help reduce dependence on parents and educational loans.

Secondly, important benefits is the development of practical skills. part-time jobs teach students time management, communication, teamwork,

and problem-solving skills. Qualities that are difficult to learn only from textbooks, work experience also improves students' resumes and market them more competitive in the job market after graduation.

However, opponents argue that part-time work may negatively affect academic performance. They believe students may become tired, miss classes, or fail to focus on their studies while concern is valid, it can be addressed by setting reasonable limits on working hours. If students work for a limited number of hours per week, their studies will not be harmed.

In conclusion, undergraduate students should be allowed to work on a part-time basis because it helps them financially, builds practical skills, and prepares them for real-life challenges. With proper time management and regulated working hours, part-time work can complement education rather than interfere with it.

Therefore, allowing part-time work is a positive and necessary step for undergraduate students.

Incident report:

To: Human Resources Department	Date: 26 May 2025
From: Priya Das, Senior UX Designer	Reference: 0001

Subject: Incidental report - Security Breach in Design Prototype Access. (May 25, 2025)

Incident Overview

On May 25, 2025, at approximately 3:45 PM PST, unauthorized access to a confidential design prototype file was detected within the internal Google Drive system used by the UX Design Team in the Google workspace project. The breach was flagged by an automated security alert triggered by file-sharing permission being altered externally.

Time, Date and Location:

- Date of Incident: May 25, 2025.
- Time: 3:45 PM PST.
- Location: Google HQ (Remote File Access from IP traced to Germany).
- Platform Affected: Google Drive.

Individuals Involved:

- Reported By: Priya Das (senior ux Designer)
- Access Attempt Detected From: External IP.
- System Respons Analyst Notified: Rajeev Khatri.

Description of Incident:

While reviewing access logs; it has been noticed that the prototype file has been shared externally although the folder was restricted to internal access only. Upon further investigation, the file had received a view request from an unauthorized

Gmail address.

Immediate Action Taken:

- File sharing permissions were immediately removed by the team admin.
- Incident was reported to IT security and HR within 15 minutes.

Impact Assessment:

- No confirmed download occurred.
- No sensitive data was compromised beyond initial access request.

Recommendations:

- Reinforce training on secure file sharing protocols for all project teams.
- Conduct a team-wide refresher on identifying suspicious activity.

Attachments:

- Access log summary (May 25, 2025)
- Screenshot of security alert notification.

Progress report

1. Title page:

- Title of the report.
- Name of the researcher.
- Department or organization.
- Supervisor's name.
- Date of submission.

2. Introduction:

- States the purpose of the report.
- Briefly recaps the background of the project.
- Mentions the objectives or goals being pursued.

3. Work completed:

- Describes in detail what has been done.
- Should be chronological.
- Includes milestones achieved.

4. Work in progress:

- Explains ongoing tasks being carried out at the time of reporting.
- May include early findings.

5. Work planned:

- outline the next steps.
- Specific methods, timelines and resources.
- Should show that the project is on track.

6. Challenges:

- Discusses obstacles
- Explains how challenges were addressed.

7. Changes in plan:

- Notes any revisions in objectives, methodology.
- Provides rationale for modifications.

8. Timeline:

- Presents a table or Gantt chart showing completed.
- Helps readers visualize whether the project is on schedule.

9. Conclusion:

- Concisely restates major achievements and future direction.
- Reinforces that the project is progressing as planned.

10. References:

- Lists any sources cited in the report.

Progress Report

To: Director, AI & Automation Division.

From: Farzana Rahman Project Manager.

Date: May 16, 2025.

Subject: Progress Report - AI Based Customer Support System (April - May 15, 2025)

Executive Summary:

This memo outlines the progress of the AI-Based Customer Support System currently under development by the AI & Automation Division. Major project milestones, including requirement analysis, system design, and prototype development, have been completed successfully. While minor delays occurred in the integration phase, the project remains on track for completion by June 2025.

Project Objectives:

- Automate 50% of customer inquiries using AI-powered chatbots.

- Reduce average response time from 12 minutes to under 5 minutes.
- Launch a pilot deployment by June 10, 2025.

Work Completed:

- Project Planning and Approval: Finalized by April 3.
- Requirements Gathering: Completed with stakeholder input by April 7.
- ~~Launch a pilot deployment by June 10, 2025.~~
- System Design: Approved on April 18.

Work in progress:

- CRM Integration: 60% completed; expected to finish by May 22.
- Live Testing: Initiated with selected query data.

Timeline and milestones:

Milestone	Target Date	Status
kickoff meeting	April 1	Completed
Prototype Development	May 5	Completed

Challenge and Issues:

- Chatbot NLP Performance: Slight underperformance with multilingual queries. Retraining with localized datasets is ongoing.

Next Steps:

- Finalize integration and initiate full-scale user testing.

- Prepare training material for support staff.

Resource Usage:

- Budget utilized: 56% of allocated budget.
- Hours logged: 800 hours.

Recommendations:

- Increase training data diversity for improved NLP performance.

Attachments:

- Updated Gantt chart.
- Chatbot Prototype Overview.
